COM

Customer's Own Material is estimated yardage based on 54" wide, solid-color fabric. Actual required yardage may vary depending on special instructions for matching direction of pattern. A sample must be submitted to Sauder Courtroom Furniture to determine actual yardage needed and any additional upcharge.

the sauder difference

Plybent wood frames feature fewer joints than stick-built frames and plybent wood is inherently stronger than solid wood. Beech plybent is also more durable than soft woods which compromise frame strength.

Uniform glue lines between plys ensure consistent fiber-to-fiber contact throughout the frame for superior strength. Epoxy glues have greater adhesion strength than commonly used vinyl wood glues.

Crimped mortise and tenon joinery will not loosen or fail like dowel joints and screws.

Our polyurethane finish provides high chemical resistance and protection.
